

# Torus EUV Spectral Images and EUV-FUV Spectrum

- Data obtained over 46 hours from 11-Nov-2000 03:06 UT
- ~20 Torus emission features visible
- Jovian auroral emissions visible in central rows longward of  $845\text{\AA}$
- Jovian north is left
- Dusk ansa is up, dawn ansa is down
- $561 \leq \lambda \leq 1912\text{\AA}$  from EUV and FUV channels
- Highest spectral resolution UVIS spectrum
- Data from January 14, 2001
- Average of spectra covering 4-8  $R_J$
- Wavelengths of transitions plotted below spectrum
- Almost all features a blend of lines
